Thanks Shant.
Very helpful info!

Team CD11 --

Pls see info below and photo of what these new lights will look like.
I just can request 2-3 locations, so if I get a list of 40, just let your communities know that we need to prioritize them and not all will be granted.

Thx, and pls send your location ideas to me by next Monday, 8/13

Hi Laura,

In response to your E-mail to Ed Ebrahimian and Norma Isahakian concerning the above project, please note,

The lights will be installed at Bus Stops only and will be pedestrian type (i.e. 15' high poles) with the luminaire pointing towards the sidewalk. The main purpose is to make the bus stop and approaches well lit and secure for the pedestrians.

We will be using wired system and the lights will be LED (Light Emitting Diodes). We will not be using Solar lights.

The sidewalk should be at least 7-8 feet wide allowing the installation and enough space for ADA requirements.

these locations are not subject to Prop 218 requirements as Bus Stops are considered General Benefit and hence they do not go through public vetting.

As the budget for the project is limited we are asking that you submit a few locations (2 or 3 at the most) indicating which ones are the most important.

Please find attached a photo of a similar light to the one that will be used in this project.

Please do not hesitate to contact me if you have any other questions.

Rgds,
Shant
